PARTNERSHIP

THE KOVAX FAMILY

At Kovax, we have been working hard to build a worldwide network of partners in the past years. This has resulted in a strong community, with partners in 45 countries. Together, we share knowledge, we develop new products and we are committed to building a strong and sustainable future for everyone.

Our commitment to perfection is visible in both our product range and the relationships we build with our customers. We always strive to be one step ahead, asking ourselves how we can make tomorrow's work easier and more efficient for you. With a foundation of mutual respect and trusted shared values, we create new business opportunities and long-term collaborations together.

JAPANESE ROOTS

With our mother company being situated in Japan, aiming for the highest quality is deeply rooted in our DNA.

CIRCLE OF TOGETHERNESS

In the Japanese culture, perfection is symbolized by a circle. This so-called Ensō is a recurring element in our design, supporting our commitment to perfection and to our Kovax family.

INNOVATION IS KEY

In today's quick changing world, we are always looking for new opportunities to expand our business. Together with our partners, we keep developing to grow our businesses and support each other's successes.

DISCOVER OUR
INTERFACE PADS
SCAN AND WATCH!

BUILDING A SUSTAINABLE FUTURE TOGETHER

Unlike foam backed abrasives, interface pads have an extremely long lifespan. So you don't have to constantly replace them. This not only saves you time and materials, but it also reduces waste and helps protect the planet. In addition, interface pads offer multiple options in your sanding process. For example, you can choose a hard pad for more aggressiveness or a soft pad for more uniformity or to sand curves. This way you can personalize your sanding process!

BENEFITS

- BETTER FOR THE ENVIRONMENT
- DURABLE AND LAST FOR A LONG TIME
- OFFER MORE OPTIONS IN TERMS OF AGGRESSIVENESS AND UNIFORMITY

At Kovax, sustainability is at the heart of everything we do. We installed solar panels on our roof, isolated our walls and where we can, we adjust our products to make them more durable and sustainable. Our Organic Tolekit is made from renewable resources, reducing the need for frequent replacements. By focusing on products that last, we minimize waste and help protect the environment. We believe in creating solutions that not only meet your needs but also contribute to a greener future. With Kovax, you can trust that every product is thoughtfully designed for sustainability and performance. Together, we can make a positive impact on the planet.

MAXFILM P60 - P600

MAXFILM STANDS FOR MAXIMUM DURABILITY FOR ALL YOUR SANDING WORK, FROM SANDING BARE METAL TO SANDING PRIMER.

ADVANTAGES MAXFILM

The film backing of Maxfilm allows a more direct contact with the sanding surface and prevents the grains to drop into the backing. In combination with its double anti-clogging coating this results in a significantly longer lifetime. The printed P-value on top of the disc ensures maximum ease of use.

TOP PRODUCTS

YELLOW FILM P800 - P2000

THE NUMBER ONE SOLUTION FOR BLENDING ZONES, WITH A GUARANTEED PERFECTLY, NON-VISIBLE TRANSITION FROM OLD TO NEW CLEAR COAT.

ADVANTAGES YELLOW FILM

The film backing in combination with an anti-burning coating allows a cool sanding process. Consequently, burning spots can be brought to a minimum and the risk of deep scratches is reduced significantly. Yellow Film is ideal for top coat sanding, removal of imperfections and removal of orange peel structure. The main markets of Yellow Film are the automotive sector and the wood industry.

TOLECUT K800 - K3000

THE WORLD CHAMPION WHEN IT COMES TO DRY IMPERFECTION REMOVAL.

ADVANTAGES TOLECUT

Tolecut is a dry sanding system. Without the use of water it is always possible to see how far the imperfection has been removed. Because of the constant visible result, the risk to sand through the topcoat is reduced to a minimum. Tolecut is unique in its cutting power and due to its flexibility it is also suitable for concave and convex areas. The ease of use makes it a must have for every dent professional.

THE POWER OF INNOVATION

At Kovax, we believe that innovation starts with collaboration. That's why we created the Robotic Solution Centre, a place where we bring together technology, expertise and partners. From robotics and sensors to vision systems, software and smart end-effectors (for instance sanding heads), in our center we explore how these technologies work best together and test the latest innovations. In this way, we don't follow the market - we help it move forward.

Our challenge, our joint approach

Together with your trusted Kovax Partner, we translate your requirements into a concrete solution. This gives you access to our technical base, up-to-date knowledge and proven innovations, without you having to reinvent the wheel yourself.

Why Kovax?

With decades of experience in fine dry sanding and a broad network of technology partners, we ensure you have access to the very best the

market has to offer. In our center, we test real customer cases so that you know solutions don't just work in theory, but in practice.

Shaping tomorrow

The Robotic Solution Centre is not the finish line, but the starting point. For you, for your Kovax Partner and for the future of your business. Automation that is accessible, scalable and profitable.

We are Kovax, your partner for sustainable automation. Together we are building the future of sanding and polishing.
